

Nespresso launched a new Limited-Edition coffee from Nicaragua

In March this year, Nestlé Nespresso SA launched a new coffee single origin capsule, "Nicaragua: La Cumplida refinada". The Nespresso coffee experts have cooperated with local farmers and the NicaFrance Foundation to identify the perfect natural fermentation processes for the harvested coffee beans. The result is a differentiated sweet and light coffee profile with wild fruity notes.

Cafetalera NicaFrance, our partner since 2015, is a family-owned agroforestry company specialized in the production of high quality and shade-grown coffee. In partnership with ECOM Trading and CIRAD, Cafetalera NicaFrance has developed a high-yielding and rust resistant Arabica variety, Marsellesa. NicaFrance Outgrowers, which is also part of our investment strategy, rehabilitates pastures and abandoned coffee farms located in the mountains surrounding Matagalpa. These farms suffered from the rust disease outbreak and other climate-related difficulties. The objective of this project is to offer state-of-the-art techniques to small and medium coffee growers in the vicinity of La Cumplida farm.
